Foldable E Flute Corrugated Wine Mailer Shipper Box With Paper Divider Insert

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: XL Packaging
- Certification: ISO 9001:2015, FSC
- Model Number: XL-WM-2026
- Minimum Order Quantity: 500 Pieces
- Price: USD 0.95 - 2.40 / Piece
- Packaging Details: Flat packed and banded, 40 units per 5-ply corrugated export carton, palletized on request
- Delivery Time: 7-10 days for samples, 15-22 days for bulk production
- Payment Terms: T/T,L/C at sight,Trade Assurance
- Supply Ability: 500000 Pieces per Month

Product Specification

- Box Style: Foldable Mailer With Self-locking Base And Tuck Lid
- Board Grade: E Flute Single Wall Corrugated, 1.5-3 Mm
- Board Weight: 350-450 Gsm Combined, Kraft Or White Top Liner
- Insert Type: Die-cut Corrugated Paper Divider, 2-6 Bottle Cells
- Bottle Capacity: 2 X 750ml Standard, 3 Or 6 Bottle Layouts
- Assembled Size: 200 X 115 X 350 Mm, Customized Per Bottle
- Flat Packed Size: 355 X 490 X 8 Mm Per Unit
- Printing: Flexo 1-3 Colours Or Offset Litho Label CMYK
- Carton Quantity: 40 Flat Units Per 5-ply Export Carton
- Recyclability: 100 Percent Paper Based, Water-based Inks
- Highlight: **Paper Divider Wine Insert**, **E Flute Corrugated Shipper**, **Foldable Wine Hamper Mailer Box**

Product Description

Wine sold online lives or dies in the parcel. This foldable E flute corrugated wine mailer shipper box is a shipper and a gift box in one piece: the outer shell carries the parcel through courier networks, and once opened it presents the bottles in a clean, branded tray that looks deliberate rather than improvised. Because the lid folds over the front panel, there is no tape on the visible faces, so the customer opens the box and sees your artwork first, not a strip of packing tape.

Inside, a die-cut paper divider insert separates and locks each bottle, so two 750 ml bottles travel without touching each other. The divider is made from the same recyclable board as the shell, which means the whole wine mailer box can be flattened and placed in a normal paper recycling stream, a point that European subscription buyers ask about on almost every first inquiry. Printed in warm orange and red brand colours, the mailer reads festive enough for holiday gifting and calm enough for year-round direct to consumer wine packaging.

Key Features

- **Paper Divider Insert:** A die-cut corrugated divider separates bottles on all four sides and holds them clear of the walls, so the labels do not scuff during courier handling.
- **E Flute Corrugated Shipper:** Single wall E flute gives a flat, print-friendly surface with roughly 3 mm of cushioning, keeping a wine bottle shipping box slim enough for standard parcel tariffs.
- **Foldable, No Glue:** The box ships flat and locks together with a self-locking base and tuck lid, assembled in about fifteen seconds by hand with no tape or stapler.
- **Tape-Free Front Panel:** Because the lid wraps the front, the visible faces stay clean and the custom printed mailer box arrives looking like a gift rather than a shipping carton.
- **Wine Hamper Box Layouts:** Two, three and six bottle configurations, with optional accessory wells for glasses, openers and tasting cards in the same foldable shipping box.
- **Kraft or White Top Liner:** Choose natural kraft corrugated box finish for a craft look, or white top liner for full colour orange and red artwork with a crisp edge.
- **Eco Friendly Wine Packaging:** 100 percent paper-based construction with water-based inks and no plastic foam, recyclable and repulpable in standard mill streams.

Technical Specifications

Parameter	Specification
Box Style	Foldable mailer with self-locking base and wrap-over tuck lid
Board Grade	E flute single wall corrugated, 1.5 mm to 3 mm caliper
Board Weight	350 gsm to 450 gsm combined, kraft or white top liner
Insert	Die-cut corrugated paper divider, 2 to 6 bottle cells, optional accessory well
Printing	Flexo 1 to 3 colours, or offset litho label for full colour CMYK artwork
Finishing	Matte or gloss varnish, water-based coating, optional spot UV on lid
Bottle Capacity	2 x 750 ml standard, 3 or 6 bottle hamper layouts available
Assembled Size	200 x 115 x 350 mm for two bottles, custom sizes per bottle profile
Flat Packed Size	355 x 490 x 8 mm per unit, stacked and banded
Unit Weight	Approx. 185 g per two-bottle mailer
Master Carton	40 flat units per 5-ply export carton, 0.062 cbm
Certification	ISO 9001:2015 quality system, FSC certified board on request

Where This Mailer Box Works Best

The same foldable corrugated paper mailer shipper box gift box serves a tasting room, a subscription club and a marketplace seller, but each of them worries about something different. The table below pairs the buying scenario with the concern we hear most often and the structural answer built into the box.

Application Scenario	What Customers Ask About a Foldable Corrugated Mailer Shipper Box	How This Box Solves It
Direct to consumer wine e-commerce parcels	Will the bottles arrive intact after courier sorting and drops?	E flute shell plus a four-sided paper divider insert holds bottles clear of walls and survives a 1.2 m drop test in its master carton.
Wine club and subscription wine box shipments	Can staff pack hundreds of parcels quickly during dispatch week?	Self-locking base and tuck lid assemble in about fifteen seconds with no tape, so packing lines keep pace without extra labour.
Two bottle wine gift box for holidays	Does the parcel still look like a gift when it arrives?	Wrap-over lid leaves the front panel free of tape and labels, so the printed artwork reads clean on the doorstep.
Wine hamper box with glasses and accessories	Can we add a corkscrew or tasting card without a second box?	Optional accessory wells are die-cut into the same divider, keeping everything in one foldable wine hamper box.
Marketplace and third-party logistics fulfilment	Will the box fit standard parcel size bands and avoid oversize fees?	Slim 3 mm board keeps the assembled parcel inside common carrier size tiers, protecting your freight cost per order.
Winery tasting room takeaway packaging	Can the box carry cellar-door branding without a luxury budget?	Flexo print in orange and red on kraft gives strong brand presence at a lower tooling cost than rigid gift boxes.
Sustainable and organic wine brands	Is the packaging recyclable and free of plastic inserts?	Fully paper-based construction with water-based inks is recyclable and repulpable, no foam or plastic cushioning.
Distributor and wholesale wine boxes	Can the same box ship flat to keep warehousing compact?	Flat packed at 8 mm per unit, 40 units per carton, so storage and inbound freight volume drop sharply.

Packaging and Shipping Logistics

Mailers leave the factory flat, banded in tens and packed in 5-ply export cartons with moisture protection. The schedule below reflects typical lead times for a 5,000 piece order from Guangdong; final timing is confirmed on your proforma invoice.

Shipping Method	Packing Format	Quantity per Carton	Transit Time	Notes
Express courier (DHL, FedEx, UPS)	Flat packed, banded, double-wall carton	40 units	3 to 5 working days	Used for samples and artwork proofs, door to door with tracking.
Air freight	Flat packed, 5-ply carton on pallet	40 units, 0.062 cbm	7 to 10 days to major airports	Suited to launch orders under 1 cbm or urgent restock before a holiday peak.
Sea freight LCL	Palletised, stretch wrapped, moisture barrier bag	24 cartons per pallet	25 to 35 days port to port	Cost efficient from 1 to 12 cbm, can be consolidated with other suppliers.
Sea freight FCL 20GP	Palletised or floor loaded	About 10,000 flat units	28 to 40 days port to port	Lowest unit freight for volume programmes, loading photos shared before departure.
Rail and land bridge (EU inland)	Palletised, moisture barrier bag	24 cartons per pallet	22 to 30 days to EU inland hub	Practical alternative when ocean space is tight ahead of Q4 gifting season.

Production lead time is 15 to 22 days after artwork approval for 5,000 pieces, and 7 to 10 days for pre-production samples. Every shipment is photographed carton by carton before loading.

Customization Process, From Inquiry to Delivery

A custom corrugated mailer programme runs through eight steps. The table lists what happens at each stage and what we need from you so the timeline holds.

Step	What We Do	What You Need to Prepare or Confirm
1. Inquiry and brief	Reply within 12 working hours with a structure suggestion and indicative price	Bottle dimensions or sample bottle, quantity, bottle count per box, logo files
2. Quotation and spec lock	Issue a formal quotation covering board grade, insert layout, printing and freight	Confirm quantity, Incoterms (FOB, CIF or DDP) and currency
3. Dieline and artwork	Send the flat dieline for shell and divider, then a digital mock-up on your artwork	Approve the dieline before design work, supply vector logo and Pantone references
4. Sample production	Produce a physical sample with real divider fit and printed colour	Test the bottle fit yourself, confirm colour in daylight, sign the approval sheet
5. Deposit and material release	Release corrugated board and print plates after the deposit clears	Pay the agreed deposit, confirm billing and consignee addresses
6. Bulk production	Print, die-cut, slot and bundle with in-line inspection on each run	Approve any board or liner substitution in writing before the run starts
7. Inspection and photos	Run AQL 2.5 inspection, check divider fit and carton drop test results	Review the inspection report and confirm loading instructions
8. Booking and delivery	Book the carrier, issue shipping documents and share tracking	Confirm consignee details, customs broker and balance payment terms

Frequently Asked Questions

Q: What is the minimum order quantity for a custom printed mailer box?

A: 500 pieces per artwork version for flexo printed mailers, and 1,000 pieces for full colour offset label work. Stock sizes with your sticker branding start at 300 pieces.

Q: Is E flute strong enough to ship wine by courier?

A: Yes, when paired with the divider insert. E flute gives a flat printing surface and about 3 mm of cushioning; in our drop test the packed two-bottle mailer survived a 1.2 m drop on corner, edge and face without bottle contact damage.

Q: How much does a sample cost and how long does it take?

A: Sampling is 30 to 70 USD depending on printing and insert complexity, credited back against your bulk order. Turnaround is 7 to 10 days after artwork approval.

Q: Can the divider be customised for my bottle shapes?

A: Yes. Send bottle diameter, height and shoulder profile, or ship one bottle to us. We cut the insert to your exact silhouette, and can add a neck lock for sparkling wine or a wider cell for Burgundy.

Q: Do you supply the dieline for my designer?

A: Yes. We provide shell and divider dielines in AI, PDF and EPS with bleed, safe area and fold line layers, so artwork lands correctly after die-cutting.

Q: Which printing options work on corrugated board?

A: Flexo printing in one to three spot colours is the most economical on kraft board. For photographic artwork or gradients in orange and red, we apply an offset litho label to a white top liner for full CMYK detail.

Q: What are your payment and trade terms?

A: 30 percent deposit by T/T with the balance against the bill of lading copy, L/C at sight above 30,000 USD, and Trade Assurance on request. FOB Shenzhen, CIF and DDP quotations are all available.

Q: Can you support wholesale wine boxes for distributors and 3PLs?

A: Yes. We hold unprinted stock of the standard two-bottle mailer so distributors can restock in 12 to 15 days, and we can print and hold your artwork in buffer stock for peak season releases.
