## Product Description

### Gift Box Custom Printing ECO Friendly White Cardboard Paper Packaging Scented Candle Box With Lid And Base

Customized printing gift box made of environmentally friendly white cardboard paper, perfect for packaging aromatherapy candles. This design not only meets the current market demand for environmentally friendly materials, but also ensures durability and excellent quality by using 157gsm drawing paper and 2mm cardboard. In addition, using CMYK printing and matte film covering technology can present high-quality surface effects and effectively showcase customized brands.

In the design of the lid and bottom, it's necessary to ensure safe and elegant candle storage. This can be achieved by improving the packaging structure to fully recycle the product's packaging while maintaining consistency in appearance and brand image. For example, one can refer to the packaging design of multimodal interactive aromatherapy candles, combining the music box prototype with floral design elements, and then designing packaging with unique personality charm.

In addition, this customized gift box is suitable for candles of various sizes, which is particularly important for meeting the needs of different consumers in the market. By tailoring paper packaging boxes, it is possible to accurately measure the size of the packaged item and determine a reasonable correction factor to ensure a perfect fit of the packaging.

To improve efficiency, convenient delivery options such as express delivery, air freight, railway, or sea freight can be chosen. Quick sampling can be provided within 1-7 days, facilitating quick decision-making, which is crucial for improving customer satisfaction and market response speed.

In summary, by comprehensively considering various factors such as material selection, design innovation, production process, and logistics distribution, the market competitiveness of customized printed gift boxes can be effectively enhanced, bringing greater brand value and sales potential to enterprises.
