- Sample Time: 5-7 Working Days
- Highlight: **12 Cavity Food Safe Chocolate Box, Chocolate Box With Kraft Tray, Custom Praline Candy Packaging Box**

Product Description

12pcs Food Safe Contact Chocolate Box with Kraft Cavity Tray

A practical **12 piece chocolate box** engineered for hygiene-sensitive buyers: the food safe contact box uses food-grade kraft paperboard, so chocolates can sit directly in the tray with complete peace of mind.

This is **custom chocolate packaging** that is genuinely **food safe packaging** – a natural kraft look that still feels like a gift. The **kraft chocolate box** body gives a warm, artisanal feel, while the twelve precision cavities hold pralines, truffles and filled chocolates upright and unmarked. For patisseries and chocolatiers ordering **bulk chocolate packaging**, it delivers the compliance documentation buyers need, without the plasticky look of conventional food trays.

Why Buyers Choose This 12-Cavity Chocolate Box

Food safe contact coated paperboard tray – suitable for unwrapped chocolates, with FDA / LFGB compliant materials.

Twelve cavities in a custom layout: round, square, heart or mixed diameters to match your assortment.

Kraft or white cardboard outer, printed with your **custom logo chocolate boxes** branding in CMYK or Pantone.

Flat-pack delivery: the **chocolate box manufacturer** saves you freight with knock-down construction, assembled in under ten seconds.

Moisture-resistant lining option protects **chocolate truffle box** freshness in warm climates.

Recyclable and compostable paper structure supports your **recyclable packaging boxes** claims on shelf and online.

Customer Concern → How This Box Solves It → Scenario

Customer Concern	How This Food Safe Box Solves It	Applicable Scenario (Chocolate Packaging Use)
Chocolate touches the box – is the material safe?	Food-grade coated paperboard tray, FDA / LFGB compliant, SGS test report available	Direct-contact packaging of unwrapped pralines and truffles
Assorted chocolates need fixed portions	12-cavity tray separates flavors and prevents flavor mixing and sugar bloom transfer	12-piece retail boxes, advent-style daily sets and tasting collections
Boxes arrive crushed or dented	Rigidized kraft board with reinforced corners; flat-pack design ships flat and erects on site	Long-distance export of wholesale candy boxes to distributors
Brands want natural, eco image	Kraft texture, soy-based inks and recyclable board tell a clean sustainability story	Organic chocolate brands, farmers' markets and premium delis
Custom shapes don't fit standard trays	Cavity map engineered from your chocolate 3D drawing or physical sample	Bespoke chocolate praline packaging for artisan collections

Use it as a single-layer gift box or stack several units inside a rigid sleeve for hampers and corporate gifting – our **custom printed chocolate boxes** scale from 500-piece pilot orders to full container programs.

Specifications at a Glance

Item	Details
Box Type	Lid & base kraft chocolate box with 12-cavity food safe tray
Material	Food-grade kraft paperboard 350-450gsm, rigidized options available
Cavity	12 cavities, custom diameter and depth per chocolate
Printing	CMYK offset with eco soy-based inks
Finishing	Matte lamination, gold foil logo option, embossing

Food Safety	FDA / LFGB food contact compliant, SGS tested
Size	Customized to your chocolate dimensions
MOQ	500 pieces per design
Sample Time	5-7 working days

FAQ – Paper Box Buying Questions, Answered

Q1. What exactly does “food safe contact box” mean?

It means the inner tray and board surfaces are manufactured from food-grade paperboard with coatings that meet FDA (USA) and LFGB (EU) requirements, so unwrapped chocolates can sit directly on the material without migration concerns.

Q2. Can the 12 cavities fit chocolates of different sizes?

Yes. Tell us the diameter and height of each chocolate – or send physical samples – and we will engineer a cavity map with the right depth and a finger-lift gap for easy removal.

Q3. Do you offer other cavity counts such as 6, 9, 16 or 24?

We do. The tooling is modular, so the same kraft box style can be produced with 6, 9, 12, 16 or 24 cavities. It is often cheaper to keep one outer size and change only the tray insert.

Q4. Are the inks and coatings safe for food packaging?

We print with soy-based inks and apply coatings only on the outside surfaces. The food-contact side stays unprinted or uses a food-grade barrier coating. Relevant test reports are provided with your order documentation.

Q5. What is the minimum order for a custom design?

500 pieces per design is our standard MOQ for custom printing and cavity tooling. For stock-size kraft boxes with a simple logo print, we can accept smaller quantities – please ask when you send the inquiry.

Q6. How is the box packed and shipped so cavities stay clean?

Boxes are flat-packed in poly bags inside 5-layer export cartons, with trays nested separately to keep cavities dust-free. Express, air and sea options are available with full tracking.

Packaging & Logistics

Stage	Details
Inner Packing	Flat-packed boxes in poly bags; trays nested and wrapped separately to keep food-contact surfaces clean
Export Carton	5-layer corrugated carton, 50-80 sets per carton by size; weight controlled under 25kg per carton
Palletizing	Export pallets with stretch film for sea freight; pallet height per shipping line standard
Sample Dispatch	1-3 working days by DHL / FedEx / UPS after sample approval
Production Time	15-20 working days for first orders; 7-10 days for repeat orders
Shipping Options	Express 3-7 days; air freight 5-10 days; sea freight 15-35 days by destination
Tracking & Support	Tracking number provided on shipment day; aftersales support until goods are received

Customization Flow: From First Message to Final Delivery

Step	What Happens	What to Watch Out For
1. Inquiry	Tell us chocolate size, pieces per box, quantity and market	Mention your destination country – food-contact documentation requirements differ by market

2. Quotation	Price, MOQ and delivery schedule within 24 hours	Confirm whether you need FDA, LFGB or SGS documents included
3. Cavity & Artwork Proof	Dieline, cavity drawing and 3D preview sent for approval	Verify cavity depth against your chocolate height and check logo colors
4. Sample Approval	Physical sample produced in 5-7 days with your print	Place a chocolate in the cavity to test fit, removal and closure
5. Production	Runs after 30% deposit; in-line QC at printing, die-cutting and tray forming	Lock the artwork version and carton marking before production starts
6. Final Inspection	100% inspection with photos and video report	Approve the inspection report; request carton drop-test photos if needed
7. Shipment	Poly bag → carton → express / air / sea with tracking number	Check your customs broker has the packing list and food-contact statement
8. Receiving	Goods delivered; reorder details archived	Inspect a few cartons on arrival and keep a reference sample

Sourcing **gift box packaging** for a launch date? Tell us the deadline in your very first message – we will tell you honestly whether the schedule is achievable and reserve production capacity for your order.
