Product Description

Custom Oval Shape Hamper Gift Box With Handle For Biscuit Dessert Tea Packaging

Present biscuits, desserts and tea in a format that feels like a gift, not a chore. This **hamper gift box** pairs a sturdy carry handle with a clean oval silhouette, so your products leave the shelf looking ready to give. It is one flexible design for brands that sell **custom packaging boxes** across bakery, confectionery and beverage lines.

The box is built as a rigid **gift box with handle**: a die-cut board shell wrapped in printed art paper, topped with a reinforced handle that stays firm under load. Whether you run a small patisserie or a large food brand, the same structure scales from one flavour to a full gift range.

A Hamper Box That Carries Real Weight

A hamper is only as good as its handle. Instead of a glued ribbon that tears, this **hamper box** uses a riveted paper or board handle tested to lift a fully loaded pack. The oval base spreads the load evenly, so biscuits and jars stay steady inside while the box is carried.

Premium Surface For Dessert And Tea Gifts

For tea and dessert lines, presentation sells the first bite. The lid accepts full-colour CMYK printing, Pantone matching and optional hot foil, turning a plain **tea gift box** into a counter-ready piece. Matte lamination keeps the finish soft to the touch, the kind of detail European and North American buyers associate with **luxury gift box** quality.

Oval Shape That Stands Out Online

Most **biscuit packaging box** designs are square, so an **oval gift box** is instantly recognisable in search results and unboxing photos. The curved panel gives designers more room for a logo, and the shape reduces empty corner space, which means less filler and a tighter shelf footprint.

Food-Safe And Eco-Conscious Materials

Boxes are made from food-grade board with odourless inks, suitable for direct food contact when lined. For brands pushing sustainability, we offer FSC-certified **eco friendly gift boxes** and recyclable **kraft paper box** options, aligning with packaging regulations in the EU and the US.
