Product Description

Custom Silver Paper Lid and Base Box With Embossing Texture

This **custom printed packaging box** is built as a silver paper **lid and base box**, a two piece structure that gives cosmetics and gifts a solid, premium feel the moment the lid lifts away. Wrapped in metallic silver art paper over rigid grey board, every **rigid gift box** carries a quiet, reflective sheen that suits luxury skincare, fragrance and gifting collections.

The surface is finished with a fine **embossing texture** that adds a subtle raised touch, turning a plain panel into a tactile **embossed paper box**. Whether you need a single colour logo or full artwork, each **luxury packaging box** is produced to your brand, your size and your target market.

Usage Scenarios: How Our Lid and Base Box Solves Your Concerns

Below we map the most common worries buyers raise about a **lid and base box** and how our **cosmetic packaging box** answers them across real applications such as cosmetics, skincare sets and perfume sample packaging.

Scenario	Customer Concern About Lid and Base Box	How Our Box Solves It
Luxury Cosmetics Sets	A plain box looks cheap and the products shift around during shipping.	A rigid lid and base box with a die cut insert holds each item in its own slot, so a custom cosmetic packaging box looks premium and arrives undamaged.
Perfume & Fragrance	The bottle rattles inside and the cap can chip in transit.	A snug two piece fit plus a flocked or foam base cushions the bottle, turning a simple cardboard gift box into a protective perfume packaging box.
Skincare Kits	Multiple jars look untidy and slide around when the set is opened.	Custom foam or cardboard dividers create neat slots, so the skincare packaging box keeps every jar upright and gift ready.
Sample & Trial Kits	Small samples get lost inside an oversized box.	A compact insert scales down to sample sizes, so the folding carton box presents mini products cleanly for retail and mailer use.
Retail Display	The box does not reflect brand positioning or the intended price point.	Silver paper, embossing and a custom logo box finish mirror your identity the moment a buyer picks it up.

Key Advantages

Premium Silver Finish: metallic silver art paper lifts a standard silver foil gift box into a luxury packaging box with a soft reflective sheen.

Tactile Embossing Texture: raised embossing adds depth and grip, so the embossed paper box feels as good as it looks.

Strong Two Piece Structure: a rigid two piece box protects fragile glass and keeps the lid and base box square and solid.

Optional Magnetic Upgrade: the same structure can be rebuilt as a magnetic closure box for a smoother open and close.

Eco Friendly Options: a kraft paper box and FSC certified board support your sustainability claims.

Reliable Quality Control: three inspections from material selection to a 100 percent check on finished goods.

Technical Specifications

Product Name	Custom Silver Paper Lid and Base Box With Embossing Texture For Cosmetic Packaging
Box Style	Two piece silver paper lid and base box, magnetic closure option available
Material	Metallic silver art paper wrap over 1200g grey board / kraft paper option

Production Lead Time	12-20 days after sample confirmation
Artwork Formats	AI, PDF, CDR, EPS, high resolution PNG
Certifications	ISO 9001, FSC, Sedex

Packaging & Logistics

A clear view of how your paper box order is packed and shipped, so you can plan receiving, warehousing and reorder timing with confidence.

Order Quantity	Inner Packing	Outer Carton	Shipping Method	Lead Time	Notes
Sample (under 500 pcs)	Poly bag per piece	Small export carton	DHL / FedEx / UPS express	3-5 days	Best for silver paper and embossing approval
Small batch (500-5,000 pcs)	50-100 pcs per poly bag	5-layer corrugated carton	Air freight or express	7-12 days	Carton size and weight confirmed before dispatch
Mass order (5,000-50,000 pcs)	100-200 pcs per poly bag	5-layer corrugated pallet ready carton	Sea freight FCL / LCL	18-30 days	Pallet or loose loading per your warehouse
Urgent restock	Poly bag per piece	Standard export carton	Air freight	5-8 days	Subject to production schedule and stock

Freight times are estimates from factory dispatch and exclude customs clearance. We provide a full packing list and loading photos before every shipment.

Customization Process: From Inquiry To Delivery

Step	What Happens	What You Should Note
1. Inquiry	You send us your product, target size, quantity and artwork or ideas.	Share the exact product dimensions and brand colours so we quote accurately.
2. Quotation	We confirm structure, material, printing and unit price within 24 hours.	Check whether silver paper, embossing or the insert is included in the quoted price.
3. Artwork & Proofing	Our designer prepares a die cut and digital mock up for your approval.	Approving the die cut protects the fit; confirm the embossing position on the proof.
4. Sampling	A physical sample is produced and shipped to you.	Confirm silver paper shade and embossing texture against your standard before mass production.
5. Order Confirmation	You place the order and pay the deposit.	A 30 percent deposit is standard; confirm the delivery date in writing.
6. Mass Production	Printing, embossing, die cutting and gluing run on automated lines.	We share production photos and report progress during the run.
7. Quality Inspection	Three inspections plus a 100 percent check on finished goods.	Ask for the inspection report if your buyer requires documented QC.
8. Balance & Shipment	We pack, load and ship after the balance is settled.	Review the packing list and loading photos before the container leaves.
9. Delivery	Goods arrive at your port or door via sea or express.	Keep customs documents ready to avoid clearance delay.

Frequently Asked Questions

Q: Are you a trading company or a manufacturer?

A: We are a direct factory with our own paper box production lines in Dongguan, Guangdong. You work with the source, which keeps cost and lead time under control.

Q: What is the minimum order quantity for a custom printed packaging box?

A: Our standard MOQ is 500 pieces per design. For a first trial or a new brand launch we can discuss smaller runs, and larger volumes bring the unit price down.

Q: Can you make a lid and base box in silver paper?

A: Yes. We wrap metallic silver art paper over rigid board, and the lid and base box can be paired with embossing or foil so the finish matches

your brand.

Q: How does embossing texture affect the price?

A: Embossing adds one finishing step, so the cost rises slightly per unit. On large orders the impact is small, and we always list it separately in the quotation.

Q: How long is production and shipping?

A: Sampling takes 5-7 days, mass production 12-20 days after sample approval. Express shipping is 3-5 days and sea freight 18-30 days depending on your port.

Q: Can I get a sample before placing a bulk order?

A: Yes. We offer a pre-production sample so you can check the silver paper, embossing and insert fit before you commit to a full run.
