

Custom Printed Round Paper Tube Box Podium Style Perfume Bottle Packaging With Foam Insert

Our Product Introduction

Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: OEM/ODM
- Certification: ISO 9001, FSC, SEDEX
- Model Number: Tube-Perfume-FT002
- Minimum Order Quantity: 500 Pieces
- Price: USD 0.65-1.20 / Piece
- Packaging Details: PE film inner wrap with foam insert pre-fitted, 5-layer export corrugated carton of 50-100 pcs, optional fumigation-free plywood pallet
- Delivery Time: 18-25 days after artwork and deposit confirmed
- Payment Terms: T/T,L/C,PayPal,Western Union
- Supply Ability: 200000 Pieces per Month

Product Specification

- Product Name: Custom Printed Round Paper Tube Box For Perfume
- Structure: Rolled Edge Round Tube With Telescoping Lid
- Material: Rigid Greyboard 1.5-2.5mm + 157gsm C2S Art Paper
- Inner Insert: Die-cut EVA / EPE Foam Tray, Multi-cavity Available
- Style: Podium Style Raised Display Platform
- Accessory: Satin / Grosgrain Ribbon Pull
- Printing: Offset CMYK / Pantone Spot / Hot Foil Stamping
- Surface Finish: Matte Or Gloss Lamination / Soft Touch / Spot UV
- Diameter: 30mm - 120mm Customizable
- Height: 60mm - 250mm Customizable
- Bottle Capacity: 3ml / 5ml / 10ml / 30ml / 50ml / 100ml

Product Description

Custom Printed Round Paper Tube Box Podium Style Perfume Bottle Packaging With Foam Insert

A complete paper tube packaging solution for fragrance brands: rigid round tube body, die-cut foam insert, ribbon pull and podium style presentation. Every diameter, height and artwork detail is built to your bottle.

Product Overview

This round perfume gift box is engineered around one job: holding a fragrance bottle perfectly still while making it look worth its price on the shelf. The body is formed from rigid greyboard wrapped in C2S art paper, finished with a rolled edge rim so the opening feels smooth in the hand and never splits after repeated use.

Inside, a die-cut foam insert is cut to your exact bottle profile, so a 5 ml discovery vial, a 30 ml eau de parfum or a 100 ml flacon all sit at the same height and cannot rotate, tilt or knock against the tube wall. The lid closes with a firm friction fit, and an optional satin ribbon makes the set gift-ready the moment it leaves your warehouse.

From single-colour logo stamping to full-surface Pantone printing with hot foil and spot UV, the whole surface is your artwork. Because the tube is produced from FSC-certified paperboard with water-based glue, it also answers the packaging compliance questions that EU and US retail buyers now ask in every sourcing meeting.

Four Core Selling Points

1. Foam Tray Built For Perfume Bottles

Die-cut EVA, EPE or molded pulp foam insert with individual cavities. Bottles stay upright, glass never touches glass, and the foam insert packaging keeps the set retail-ready after the customer opens it.

2. Podium Style Display Cylinder

The insert is raised on a podium step so the bottle sits forward and elevated. This cylindrical packaging box turns an ordinary tube into a counter display that sells without a salesperson.

3. Ribbon Round Tube For Perfume And Candle

Satin, grosgrain or cotton ribbon in any Pantone colour, with a pull-tab or wrap-around bow. The same candle packaging box structure also fits reed diffusers, essential oil and skincare bottles.

4. Custom Printing And Custom Size

Offset CMYK, Pantone spot colour, hot foil stamping, embossing, matte or gloss lamination and spot UV. These are genuinely custom printed boxes: diameter 30-120 mm and height 60-250 mm are made to order, so no bottle size is a problem.

Structure, Material And Finish Options

Component

Standard Option

Upgrade Options

Tube Body	Rigid greyboard 1.5 mm wrapped in 157 gsm C2S art paper	Kraft paper tube surface, 2.0-2.5 mm wall for heavier glass, black core board
Lid And Base	Friction-fit telescoping lid with rolled edge rim	Shoulder-neck tube, magnetic lid, window die-cut with PET or PLA film
Inner Insert	Die-cut EVA foam tray, 10 mm base thickness	EPE foam, molded pulp tray, velvet flocking, foam plus ribbon lift tab
Ribbon	Matte satin ribbon matched to Pantone	Grosgrain, cotton, metallic foil ribbon, wrap-around bow, seal sticker
Printing	Offset CMYK full colour	Pantone spot, hot foil gold or silver, emboss, deboss, silk screen
Surface Finish	Matte lamination	Gloss lamination, soft-touch, spot UV, anti-scratch varnish

A rigid paper tube keeps its shape in a warehouse for months, which is why brands running seasonal launches choose it over folding cartons. Both kraft paper tube and fully printed versions can be produced on the same die-line, so you can test a natural look and a luxury look without paying twice for tooling.

Usage Scenarios: How The Box Solves Perfume Packaging Concerns

The table below lists the questions buyers raise most often about a paper tube box with foam insert for a perfume set, and exactly how the structure answers each one. These are the same concerns luxury packaging boxes are expected to solve across US, UK, German and French retail channels.

Application Scenario	Customer Concern	How This Box Solves It
3-5 ml perfume discovery and sample sets	Small vials collide, crack or leak during courier shipping	Die-cut foam insert with one cavity per vial holds every bottle upright and separated, so vials never touch each other or the tube wall
30 ml and 50 ml retail perfume bottle	Bottle looks flat on a crowded shelf, needs premium presence	Podium style raised platform lifts the bottle forward and the rolled edge rim frames it, creating a display piece rather than a plain carton
Perfume gift set with ribbon	Set must feel gift-ready without extra wrapping	Satin ribbon pull and snug friction lid deliver a complete unboxing moment, no gift wrap or bag required at the counter
Candle, reed diffuser and essential oil bottles	Heavy glass needs strength; base can break through	2.0-2.5 mm greyboard wall plus foam base pad carries the weight and absorbs impact at the bottom of the tube
Travel and airline amenity kits	Liquid leakage and moisture inside the case	Foam tray plus optional PE inner liner isolates each bottle; rolled edge rim keeps the rim sealed and stiff after repeated opening
E-commerce and subscription shipments	Parcel handling damage and crushed corners	Rigid tube plus foam insert plus a 5-layer corrugated master carton, tested for drop and compression before dispatch

Product Specifications

Product Name	Custom Printed Round Paper Tube Box With Foam Insert
--------------	--

Structure	Rolled edge round tube, telescoping lid, podium style foam platform
Material	Rigid greyboard 1.5-2.5 mm + 157 gsm C2S art paper + EVA/EPE foam
Diameter	30 mm to 120 mm, made to your bottle
Height	60 mm to 250 mm
Bottle Capacity	3 ml, 5 ml, 10 ml, 30 ml, 50 ml, 100 ml - single or multi-cavity
Printing	Offset CMYK, Pantone spot, hot foil stamping, silk screen
Surface Finish	Matte or gloss lamination, soft touch, spot UV, emboss
Accessories	Satin ribbon, foam insert, molded pulp tray, seal sticker
Paper Certification	FSC certified board available, soy-based ink, water-based glue
MOQ	500 pieces per size and design
Usage	Perfume, candle, essential oil, cosmetic and skincare bottle packaging

Every specification above can be adjusted, and eco friendly packaging requests are welcome: plastic-free molded pulp trays, recycled board and single-colour printing are all available without changing the lead time.

Frequently Asked Questions

Q: What is the MOQ for a custom printed round paper tube box?

A: 500 pieces per size and design for standard structures. Trial orders below 500 pieces are negotiable for new brands and first launches, and wholesale packaging boxes pricing starts at 1,000 pieces.

Q: How do I make sure the tube fits my bottle exactly?

A: Send the bottle diameter, total height including cap, and the weight. We build a die-line from those figures and confirm with a physical sample before mass production. Do not send volume only, because a 50 ml bottle shape varies greatly between suppliers.

Q: Can the foam insert be cut for different bottle sizes in one set?

A: Yes. Multi-cavity trays are standard for discovery sets, so a 5 ml vial, a 10 ml roller and a 30 ml bottle can share one tube with cavities cut to each individual size.

Q: What printing methods and finishes do you support?

A: Offset CMYK, Pantone spot colour, hot foil gold or silver, silk screen, emboss and deboss. Finishes include matte and gloss lamination, soft-touch, spot UV and anti-scratch varnish. Artwork in AI, PDF or CDR with outlined fonts and 3 mm bleed is preferred.

Q: How long does a sample take, and is it free?

A: Stock-size samples can be dispatched in 3-5 working days and the sample cost is refunded against your bulk order. A fully custom printed and foamed sample takes 7-10 working days.

Q: Is the packaging recyclable or eco friendly?

A: Yes. FSC certified board, soy-based ink and water-based glue are standard, and a plastic-free molded pulp tray can replace foam on request. As a cosmetic packaging supplier serving EU brands, we can also provide material declarations for your EPR reporting.

Q: What are the payment terms, and how is quality guaranteed?

A: 30% T/T deposit with 70% balance before shipment, plus L/C, PayPal and Western Union. We run 100% visual inspection and AQL sampling before packing, and third-party inspection such as SGS or BV is welcome at your cost. QC photos and video are sent before you pay the balance.

Q: Can you ship door to door, and how do you pack the cartons?

A: Yes. Express, air freight, sea LCL and sea FCL are all available, and DDP door-to-door delivery is supported for most US and EU addresses. See the packing and shipping table below for exact timeframes.

Packaging And Shipping

Step	Packing Method	Timeframe	Notes
Inner protection	Each tube wrapped in PE film with foam insert pre-fitted and lid taped	Same day as production finish	Prevents scuffing, dust and rim deformation in transit
Master carton	5-layer export corrugated carton, 50-100 pcs per carton	1 working day	Carton marks and shipping labels printed to your instruction
Palletizing	Fumigation-free plywood pallet, stretch wrap and corner protectors	1-2 working days	Recommended for sea LCL and FCL to avoid crushing
Sample dispatch	DHL, FedEx or UPS express	3-5 working days door to door	Tracking number sent on the day of dispatch
Mass production	Tube forming, printing, foam die-cutting, assembly	18-25 days after artwork and deposit approval	Add 5-7 days in peak season from August to October
Sea freight	LCL or FCL to US and EU ports	25-35 days port to port	Book space 2 weeks ahead; DDP available for most lanes
Air freight	Airport to airport or door to door	7-12 days	Best choice for urgent re-orders and small volumes

These sustainable packaging solutions are packed to survive real parcel handling: the foam insert absorbs drop impact, and the rigid tube resists the compression that flattens ordinary cartons at the bottom of a pallet.

Customization Process: From Inquiry To Delivery

Step	What We Do	What You Should Note
1. Inquiry	Collect your bottle size, quantity, artwork or reference sample	Give bottle diameter and full height with cap, plus target price and market
2. Quotation	Send a cost breakdown within 24 working hours	Confirm whether the price includes foam insert, ribbon, printing and carton
3. Artwork And Die-line	Provide a die-line template and 3D mockup for your designer	Check 3 mm bleed, CMYK mode, outlined fonts and barcode placement

4. Pre-production Sample	Make a physical sample in 7-10 working days	Verify colour, size fit, foam cavity tightness and lid friction, then approve in writing
5. Deposit And Scheduling	Confirm 30% deposit and lock the production slot	Confirm the deposit arrives before the schedule date, or the slot moves to the next batch
6. Mass Production	Print, form, die-cut and assemble in 18-25 days	Ask for a mid-production progress photo if your launch date is fixed
7. Quality Inspection	100% visual check plus AQL sampling, QC report issued	Review QC photos and video before paying the balance
8. Balance And Shipment	Book the carrier after balance payment and issue documents	Check consignee, notify party and HS code on the B/L before telex release
9. Delivery And After-sales	Track until arrival, 30-day quality warranty	Inspect within 7 days of arrival and report any shortage with photos

The same workflow applies whether you order 500 tubes for a subscription box packaging launch or 200,000 pieces for a global retail rollout, only the scheduling and inspection depth change.

Get your personalized size & artwork solution, send inquiry for free quotation & sample support

Share your bottle dimensions, quantity and logo file. We will come back with a costed die-line, a 3D mockup and product display packaging options within one working day.
