

Custom Printed Rose Gold Foil Collapsible Card Box With White Corrugated Skincare Insert

Our Product Introduction

Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: OEM/ODM
- Certification: ISO 9001, FSC, SEDEX, Disney
- Model Number: CardBox-RG003
- Minimum Order Quantity: 500 Pieces
- Price: USD 0.20-0.30 / Piece
- Packaging Details: Flat packed in kraft paper bundles, 200-500 pcs per 5-layer export corrugated carton, optional fumigation-free plywood pallet
- Delivery Time: 15-25 days after artwork and deposit confirmed
- Payment Terms: T/T,L/C,PayPal,Western Union
- Supply Ability: 200000 Pieces per Month

Product Specification

- Product Name: Custom Rose Gold Foil Collapsible Card Box
- Box Style: Straight Tuck End / Tuck-Top Auto-Lock Bottom
- Material: 350-400gsm C1S / C2S Art Card, F-Flute Option
- Inner Insert: Die-cut White E-Flute Corrugated Insert
- Printing: Offset CMYK / Pantone Spot Color
- Foil Stamping: Rose Gold / Gold Hot Foil Stamping
- Surface Finish: Soft Touch / Matte / Gloss Lamination / Spot UV
- Size: Fully Custom, 40x40x120mm To 120x120x200mm
- Assembly: Side Glued, Ships Flat, Pops Open In 3 Seconds
- Locking: Lock-Tab Tuck / Friction Fit / Seal Sticker
- Paper Certification: FSC Certified Board Available
- Sample Time: 7-10 Working Days For Custom Printed

Product Description

Custom Printed Rose Gold Foil Collapsible Card Box With White Corrugated Skincare Insert

A machine made folding carton that ships flat, assembles in seconds and still delivers a rose gold metallic finish on the shelf. Built as a complete folding carton packaging system for skincare bottles, cream jars and perfume flacons.

Product Overview

This is a glued, auto-lock card carton rather than a hand-made rigid box, so the unit cost stays low while the printed surface still reads as premium. The structure can be produced as a top tuck box, a tuck-top with auto-lock bottom, a two-piece tray and sleeve, or a straight tuck end carton, all from the same artwork file.

The inside is where this box earns its place in a skincare packaging box program. A die-cut white corrugated insert holds the bottle or jar by the body, keeps the cap off the bottom panel, and absorbs the drop impact that a plain printed carton cannot handle. Serum droppers, 50 ml cream jars and 30 ml glass perfume bottles all get their own cavity dimensions.

Outside, the surface is a printed cardboard box finished with metallic rose gold hot foil, soft-touch lamination and spot UV. Foil can be applied to a logo, a frame line or a full decorative pattern, which is why brands use this construction for launch editions and gift sets before moving to a rigid box.

Three Core Selling Points

1. Card Folding Box With White Corrugated Insert

E-flute white corrugated insert, die-cut to your bottle profile, glued inside the carton. The bottle is held at the shoulder and base, so glass never touches the printed panel and the cap cannot smash the base in transit.

2. Machine Made, Ships Flat, Low Unit Cost

Automatic gluing line production keeps the price competitive at volume. The box is delivered knocked down and glued at the side seam, so it ships flat, saves up to 80 percent of warehouse and freight space, and assembles in about three seconds with no tape.

3. Collapsible Box With Rose Gold Foil

Metallic rose gold hot foil stamping turns a plain carton into a rose gold foil box: collapsible F-flute or 400 gsm art card body, with optional soft-touch or matte lamination and spot UV. The metallic finish survives folding, so the shine is still crisp after the box is assembled.

Structure, Material And Finish Options

--	--	--

Box Style	Straight tuck end (top tuck)	Tuck-top auto-lock bottom, reverse tuck, tray and sleeve, pillow box, drawer sleeve
Board	350 gsm C1S art card	400 gsm C2S, kraft board, black core card, F-flute or E-flute corrugated
Inner Insert	Die-cut white E-flute corrugated	EVA foam, molded pulp, paper honeycomb, cardboard platform with ribbon pull
Printing	Offset CMYK full colour	Pantone spot colour, rose gold or gold hot foil stamping, silk screen
Surface Finish	Matte lamination	Soft touch, gloss, spot UV, emboss, deboss, anti-scratch varnish
Locking	Side glue seam, friction tuck flap	Lock-tab tuck, magnetic flap, seal sticker, tear strip

Because the body is folded rather than wrapped, these custom printed boxes can be produced at 200,000 pieces per month on a single line, which is what makes short lead times possible for seasonal launches.

Choosing between card stock and micro-flute is the one decision that changes both cost and strength: a 350 gsm machine made folding box suits light bottles and cosmetics, while F-flute gives a thicker retail feel for perfume and gift sets without moving to rigid construction.

Usage Scenarios: How The Box Solves Buyer Concerns

The table below maps the questions buyers raise most often about a folding card box or a top tuck box against the way this structure answers them. The scenarios cover perfume bottle packaging and skincare packaging, the two categories this carton is ordered for most.

Skincare serum and essence bottle packaging	Bottle slides inside the carton, glass shoulder chips and the dropper cap presses on the base panel	White corrugated insert holds the bottle at body and base, caps the top pressure and absorbs drop impact that a plain carton cannot
Perfume bottle retail packaging	Needs a premium metallic look but the rigid box budget is too high	Rose gold hot foil plus soft-touch lamination on a folding carton delivers the metallic shelf presence at a fraction of rigid box cost
Top tuck box for cream and cosmetic jars	Tuck flap pops open in transit, tamper risk at retail	Lock-tab tuck flap with friction fit, optional seal sticker or tear strip for tamper evidence
DTC and e-commerce skincare brands	Storage and freight cost of pre-assembled boxes	Boxes ship flat and knocked down, saving up to 80 percent of warehouse space and cutting inbound freight volume
Gift sets and subscription kits	Every product size needs a separate carton SKU	One die-line, multiple heights and insert cavities, so a cleanser, a serum and a cream share one box family
Travel retail and sample kits	Air freight is charged by weight and volume	Lightweight 350 gsm card with a paper insert, no rigid board and no foam, keeps shipping weight minimal

Product Specifications

Product Name	Custom Printed Rose Gold Foil Collapsible Card Box
Structure	Side-glued collapsible carton, tuck-top auto-lock bottom or straight tuck end
Material	350-400 gsm C1S/C2S art card, F-flute or E-flute option
Inner Insert	Die-cut white corrugated E-flute, foam or molded pulp on request
Size	Fully custom, typical 40 x 40 x 120 mm to 120 x 120 x 200 mm
Printing	Offset CMYK, Pantone spot, rose gold or gold hot foil stamping
Surface Finish	Soft touch, matte or gloss lamination, spot UV, emboss
Assembly	Shipped flat and glued, pops open in about 3 seconds
Paper Certification	FSC certified board, soy-based ink, water-based glue
MOQ	500 pieces per size and design
Usage	Skincare, perfume, cream jars, cosmetics, gift sets

Recyclable mono-material construction is available for brands that need an eco friendly paper box with no plastic window and no foam: the insert switches to die-cut corrugated or molded pulp and the box stays fully repulpable.

Frequently Asked Questions

Q: What is the minimum order quantity for a custom folding card box?

A: 500 pieces per size and design for machine made cartons. Trial runs below that are negotiable for new brands, and wholesale paper boxes pricing drops at 3,000 and 10,000 pieces.

Q: Is a folding carton strong enough compared with a rigid box?

A: For most skincare and perfume bottles yes, provided the insert is correct. A 350 gsm side-glued carton with a corrugated insert resists drop impact better than an empty rigid box, because the insert carries the load. Choose rigid construction only when the box itself is the gift object.

Q: Can the box ship flat and still keep its shape after assembly?

A: Yes. The carton is glued at the side seam and delivered knocked down. Once opened it locks on the auto-lock bottom or the tuck flap, and the crease memory keeps the corners square. We recommend a 1 percent over-shipment on very small orders.

Q: How is rose gold foil applied, and will it crack on the fold line?

A: Hot foil stamping on a heated die after printing. We keep a 2 mm clear margin from the fold line and use a foil grade rated for folding, so the metallic surface stays intact after repeated assembly.

Q: Can I get the white corrugated insert for my own bottle size?

A: Yes. Send the bottle diameter, full height with cap and weight; we cut a die to those figures and confirm the fit with a physical sample. Multi-cavity inserts for sets are standard.

Q: How long does a sample take, and what does it cost?

A: Plain stock samples go out in 3-5 working days; a fully printed and foil stamped sample takes 7-10 working days. Sample cost is refunded against your bulk order.

Q: What artwork files do you need?

A: AI, PDF or CDR with fonts outlined, CMYK mode, 3 mm bleed and 2 mm safety margin from the fold lines. We send a die-line template and a 3D mockup for your designer before you finalise the file.

Q: What are the payment terms, and how is quality controlled?

A: 30 percent T/T deposit with 70 percent before shipment, plus L/C, PayPal and Western Union. As a cosmetic packaging supplier we run 100 percent visual inspection and AQL sampling, and third-party inspection such as SGS or BV is welcome.

Packaging And Shipping

Inner packing	Boxes bundled in kraft paper or PE film, inserts nested separately	Same day as production finish	Prevents scuffing on the printed and foiled surface
Master carton	5-layer export corrugated carton, 200-500 flat boxes per carton	1 working day	Flat pack shipping means fewer cartons and lower freight cost
Palletizing	Fumigation-free plywood pallet, stretch wrap and corner protectors	1-2 working days	Recommended for sea LCL and FCL shipments
Sample dispatch	DHL, FedEx or UPS express	3-5 working days door to door	Tracking number sent on the day of dispatch
Mass production	Printing, foil stamping, die-cutting, gluing, insert cutting	15-25 days after artwork and deposit approval	Add 5-7 days in peak season from August to October
Sea freight	LCL or FCL to US and EU ports	25-35 days port to port	Book space 2 weeks ahead; DDP available for most lanes
Air freight	Airport to airport or door to door	7-12 days	Best for urgent re-orders and small volumes

Flat-packed cartons and paper inserts keep the shipping volume low, which is what makes these subscription box packaging programs affordable to repeat every quarter.

Customization Process: From Inquiry To Delivery

1. Inquiry	Collect product size, quantity, artwork or a reference sample	Give bottle diameter and full height with cap, plus the market you sell into
2. Quotation	Send a cost breakdown within 24 working hours	Confirm whether the price includes the insert, foil stamping and cartons
3. Structure Proposal	Recommend top tuck, auto-lock or sleeve with a drawing	Check that the opening style suits your retail or e-commerce channel
4. Artwork And Die-line	Provide a die-line template and 3D mockup	Check 3 mm bleed, CMYK mode, outlined fonts, and 2 mm clearance from fold lines

5. Pre-production Sample	Make a physical printed and foiled sample in 7-10 working days	Verify foil shade, insert fit, lock strength, then approve in writing
6. Deposit And Scheduling	Confirm 30 percent deposit and lock the production slot	Confirm the deposit arrives before the schedule date or the slot moves to the next batch
7. Mass Production	Print, foil, die-cut, glue and cut inserts in 15-25 days	Ask for a mid-production progress photo if your launch date is fixed
8. Quality Inspection	100 percent visual check plus AQL sampling, QC report issued	Review QC photos and video before paying the balance
9. Balance And Shipment	Book the carrier after balance payment and issue documents	Check consignee, notify party and HS code on the B/L before telex release
10. Delivery And After-sales	Track until arrival, 30-day quality warranty	Inspect within 7 days of arrival and report any shortage with photos

The workflow is identical whether the order is 500 boxes for a first launch or 200,000 pieces, and every step above can be adapted to your sustainable packaging requirements without changing the timeline.

Get your personalized size & artwork solution, send inquiry for free quotation & sample support

Send your bottle dimensions, target quantity and logo file. We return a costed die-line, a 3D mockup and retail packaging solutions within one working day.
