Product Description

Product Overview

This angled cut flip rigid gift box (slant book-style box) is designed for manuka honey, premium tonics and bottled nutritional supplements. It is built with thick rigid board wrapped in art paper and features a unique slanted opening structure with luxury black-and-gold color matching. A gold-trimmed inner frame is included, and it can be equipped with flocked or EVA inserts to hold honey jars securely.

We support CMYK 4-color printing, spot color printing, gold / silver hot stamping, UV coating, embossing and lamination. The overall box dimension, slant cutting angle, insert profile, logo layout, color palette and box artwork are all customizable. It serves honey brands, premium health food suppliers and cross-border wellness merchants. Board thickness, wrapping paper, insert material and surface finish can be adjusted as requested.

Core Selling Points

1. Slanted Flip Book Structure — A One-of-a-Kind Unboxing Impression

Different from regular book boxes and lid-base boxes, the sharp diagonal cut brings a modern, premium silhouette. It creates a memorable opening experience and helps high-value manuka honey and tonic products stand out on shelves.

2. Classic Black & Gold Luxury Finishing — Premium Brand Aesthetic

The sophisticated black exterior paired with gold inner trim delivers an upscale, trustworthy look for health and gifting products. It photographs beautifully for e-commerce and social media while fitting premium gift-giving scenarios.

3. Gold Inner Frame + Custom Protective Insert — Stable & Clean Presentation

The built-in gold surround frame improves visual layering. CNC routed flocked or EVA inserts can be tailored to match jar shapes, preventing bottles from shifting, scratching or breaking during transit.

4. Versatile Custom Crafts & Dimensions — Flexible for Brand Series

Multiple decoration options including foil stamping, embossing and UV printing are available. The slant angle, box size and graphics can be modified freely to fit different jar specifications and build consistent brand packaging lines.
