

Custom Kraft Paper Lid Base Perfume Discovery Set Gift Box Foam Tray Texture Printing

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: OEM/ODM
- Certification: ISO 9001, FSC, Sedex
- Model Number: LB-PERF-002
- Minimum Order Quantity: 500 Pieces
- Price: USD 1.00-1.80 / Piece
- Packaging Details: Lid, base and foam tray nested separately in poly bags, 50-100 sets per 5-layer export corrugated carton
- Delivery Time: 12-18 days after sample approval
- Payment Terms: T/T,L/C,PayPal,Western Union
- Supply Ability: 300000 Pieces per Month

Product Specification

- Box Structure: Two-piece Lid And Base Rigid Gift Box
- Material: 2mm Greyboard + 120-150gsm Kraft Or Uncoated Paper
- Insert: EPE/EVA Foam Tray, Paper Pulp Option
- Surface Finish: Uncoated Matte, Linen Texture, Soft-touch Film
- Colour Scheme: Deep Navy With Gold Foil Accents, Pantone Matched
- Logo: Gold Foil Stamping, Embossing Or Screen Printing
- Box Size: Customized To Vial And Tray Layout
- Vial Capacity: 3, 5, 8 Or 12 Vials
- Sample Time: 5-7 Working Days
- OEM/ODM: Supported
- Application: Perfume, Fragrance, Skincare, Cosmetics, Gift Sets
- Highlight: Custom Kraft Perfume Gift Box

Product Description

Custom Kraft Paper Lid Base Perfume Discovery Set Gift Box Foam Tray Texture Printing

Product Overview

A perfume discovery set sells an idea before it sells a bottle. This kraft paper lid and base perfume gift box gives each 2ml vial its own foam tray well, so the set arrives exactly as it left the factory and opens like a presentation case rather than a shipping carton. The two-piece lid and base structure lifts off cleanly, which keeps the ritual intact for sampling events, press mailers and e-commerce unboxing.

The wrap uses uncoated paper, so the surface takes ink and foil without a plastic sheen — a finish that reads as quiet luxury in the hand. Pair it with deep navy printing and gold foil stamping for a look that sits comfortably next to designer fragrance brands, or keep it natural kraft for a clean, sustainable story.

Every **perfume sample box** is produced to your vial count: 3, 5, 8 or 12 slots, with the foam tray die-cut to the exact diameter of your bottles. Sizes, board weight and print coverage are all custom, and the same dieline can be reused across seasonal editions to keep your reorders simple.

Four Gift Box Styles We Produce

One structural platform, four finish options. Because the lid and base tooling is shared, mixing options in a single purchase order keeps the wholesale price per unit stable.

Box Style	Construction	Best For
Kraft paper lid and base gift box for perfume discovery set	Two-piece lid and base, 2mm kraft wrapped board, foam tray with individual vial wells	Fragrance discovery sets, sample mailers, subscription boxes
Uncoated paper gift box with foam tray	Uncoated art paper wrap, EVA or EPE foam tray die-cut to bottle diameter	Miniature vials, roller bottles, travel sprays, cosmetic ampoules
Recyclable paper gift box	Paper-only construction, water-based glue, paper pulp insert option	Brands with EU and North American sustainability targets
Texture paper gift box for premium product packing	Embossed, linen or touch film paper wrap with gold foil logo	Premium fragrance launches, VIP gifts, limited editions

Features & Benefits

Feature	Specification	Customer Benefit
Two-piece lid and base structure	Rigid 2mm wrapped board, friction fit lid	Opens like a gift box, no tearing, resealable for store testers
Foam tray insert	EPE or EVA foam, die-cut to vial diameter	Each sample stays upright, no leakage or glass-to-glass contact
Kraft paper wrap	120-150gsm kraft laminated to greyboard	Natural, tactile surface that supports a sustainable brand story
Uncoated paper finish	Uncoated art paper, matte and absorbent	Ink sits deep and flat, so small type stays legible under retail light
Recyclable construction	Paper and board only, water-based adhesive	Meets retail packaging recycling guidelines in EU and US markets
Textured paper options	Linen, embossed, soft-touch film	Adds perceived value without changing the box structure
Gold foil stamping	Hot stamping for logo and border	Premium cue at a low incremental cost per unit

Full colour printing	CMYK plus Pantone spot colours	Brand navy, gold and accent colours match across reorders
Flat-packed shipping	Lid, base and tray nested separately	Cuts freight volume and warehouse space by up to 45%
OEM and ODM service	In-house dieline design and sampling	One supplier from concept to container load

Usage Scenarios: What Buyers Ask About the Lid and Base Box

The table below covers the questions that come up most often on **perfume discovery set packaging** projects, and how this structure answers each one. It is written for sampling programmes where the box is handled by consumers, not just by warehouse staff.

Application Scenario	What the Buyer Worries About	How This Box Solves It
Perfume discovery set of 5 to 12 vials	Vials shift during transit and arrive scratched or leaking	The die-cut foam tray holds every vial upright in its own well, with no glass-to-glass contact
Sample mailers and press kits	Boxes crush in courier bags, so the set looks second-hand on arrival	The rigid lid and base walls keep their shape, and the fit lid resists edge damage in transit
Retail tester and counter display	Staff need to open and re-close the box all day without damage	Friction-fit lid lifts off and reseats repeatedly, with no tape or tear strip
Subscription fragrance boxes	Repeat monthly shipments must look identical	Shared dieline and Pantone printing keep every edition consistent
E-commerce unboxing content	The pack looks flat on camera and gets no social sharing	Deep navy wrap with gold foil and a lifting lid create a clean reveal shot
Sustainable brand positioning	Plastic inserts conflict with the brand's environmental claim	Paper pulp or moulded fibre tray replaces foam, and the whole pack recycles as paper
Gift-with-purchase promotions	Unit cost must stay low at high volume	Flat-packed kraft construction and shared tooling keep the piece cost near USD 0.6
Travel retail and hotel amenities	Sets must survive cabin pressure and humidity changes	Uncoated paper and rigid board resist humidity better than thin folding cartons

Popular Applications

- Perfume discovery and sample sets, 2ml to 5ml vials
- Fragrance subscription boxes and monthly sample mailers
- Skincare sample kits with ampoules and travel sizes
- Cosmetic gift sets for retail and duty-free counters
- Press kits and influencer mailers
- Kraft paper gift box sets for clean beauty and organic brands
- Essential oil and aromatherapy sample collections
- Luxury perfume packaging for limited and travel editions
- Custom rigid gift box with window for retail display

Product Details

Item	Specification

Box Structure	Two-piece lid and base rigid gift box
Material	2mm greyboard wrapped in 120-150gsm kraft or uncoated paper
Insert	EPE or EVA foam tray, die-cut to vial diameter, paper pulp option

Surface Finish	Uncoated matte, linen texture, embossing or soft-touch film
Colour Scheme	Deep navy with gold foil accents, Pantone matched
Printing	CMYK offset plus Pantone spot colours
Logo	Gold foil stamping, embossing or screen printing
Capacity	3, 5, 8 or 12 vials, custom layout
Size	Customized to vial and tray layout
Artwork Format	AI, PDF, PSD, EPS, CDR
Sample Time	5-7 working days
OEM / ODM	Supported, in-house dieline design
Industrial Use	Perfume, fragrance, skincare, cosmetics, gift sets

Frequently Asked Questions (FAQ)

Q1: What is the minimum order quantity for a custom printed packaging box like this?

A: 500 pieces per design. Kraft and uncoated paper versions share the same tooling, so you can split one order across two finishes without paying a second set-up fee.

Q2: How much does one lid and base box cost?

A: Typically USD 0.60 to USD 1.80 per piece for a 5-vial set, depending on board thickness, tray material and finishing. Foam trays, gold foil stamping and textured paper are the main cost drivers. Send your vial count and dimensions for an exact quote.

Q3: Can the foam tray be replaced with something recyclable?

A: Yes. We offer moulded paper pulp and die-cut corrugated inserts that hold vials just as firmly and let the entire pack recycle as paper, which keeps your eco friendly packaging claim honest at the material level. Tell us at the quotation stage, since the insert changes the dieline slightly.

Q4: Can I see a sample before ordering?

A: Yes. A plain structural sample is free, you only pay the freight. A printed sample with your artwork carries a sample fee that is credited against the bulk invoice once the order is confirmed.

Q5: What artwork files do you need?

A: AI, PDF, EPS or CDR with outlined fonts and images at 300dpi or above. If you only have a logo, our design team can lay out the print ready file for you.

Q6: How long is production?

A: 12-18 working days after artwork and sample approval for 500-5,000 sets. Heavy foil coverage and textured paper add a few days, and the confirmed date is stated in the quotation.

Q7: How do you make sure the vials fit?

A: Send one physical vial or its exact diameter, height and cap width. We cut the tray from those measurements and test-fit real bottles before the production run.

Q8: What are your payment terms?

A: 30% deposit, balance against the pre-shipment inspection report. T/T, L/C at sight, PayPal and Western Union are accepted.

Q9: Can you handle shipping and export documents?

A: Yes. FOB, CIF and DDP terms with packing list, commercial invoice and certificate of origin. Air, sea and express options are quoted side by side.

Packaging & Shipping Information

Lids, bases and foam trays are nested separately so a 40HQ container carries far more sets than fully assembled boxes would allow. Every carton is labelled with SKU, quantity and carton number.

Item	Detail
Inner Protection	Lid, base and tray in poly bags or tissue wrap, corners protected
Export Carton	5-layer corrugated export carton, 50-100 sets per carton
Carton Marking	SKU, quantity, size and carton number on two sides
Sample Lead Time	5-7 working days
Mass Production	12-18 working days after sample approval
Air Freight	5-8 days port to port
Sea Freight	22-38 days port to port depending on destination
Express Courier	3-6 days door to door for samples and small runs
Inspection	100% inspection before packing, report with photos issued
Shipping Terms	FOB, CIF, DDP available worldwide

Custom Packaging Process: Inquiry to Delivery

Step	What Happens	What the Buyer Should Confirm
1. Inquiry	You send vial count, bottle dimensions, quantity and target market	State vial diameter, height, cap type and any retail compliance rules
2. Consultation	We recommend lid and base structure, board weight, tray material and finish	Decide between kraft, uncoated, textured paper and foam versus pulp tray
3. Quotation	Itemised price with material, finishing, MOQ and lead time	Check whether tooling and sample fees are included or credited later
4. Artwork	You supply AI, PDF, PSD or EPS files; pre-press checks resolution and bleed	Outline fonts, keep 3mm bleed, confirm Pantone numbers for navy and gold
5. Dieline and Mockup	We issue the dieline plus a 3D mockup of your artwork on the structure	Approve tray layout and logo placement before sampling
6. Sample Production	Physical sample built with your print, foil and tray	Compare colour against a Pantone book, not a phone screen
7. Sample Approval	You sign off or request one revision round	Test-fit the real vials and confirm lid friction and foil adhesion
8. Deposit and Scheduling	30% deposit received, production slot booked	Confirm the ship date and receive the production schedule
9. Mass Production	Printing, lamination, foil stamping, die-cutting, tray cutting and assembly	Ask for in-line production photos halfway through
10. Quality Inspection	Full inspection, packing list and pre-shipment report	Review the report and approve shipment release
11. Shipment	Booking, loading and export document issue	Confirm consignee details and the customs HS code
12. Delivery and After-Sales	Tracking shared until arrival; reorder file kept on record	Inspect cartons on arrival and report damage within 7 days

Get your personalized size & artwork solution, send inquiry for free quotation & sample support

Send your vial count and box dimensions, and we will return a dieline, a realistic unit price and a sampling plan. One structure covers discovery sets, subscription mailers and premium gift editions, so your packaging stays consistent as the range grows.
